

# Winscribe Text Mobility

## Product Description

Mobile clinical documentation is rapidly becoming the heart of healthcare, as it allows providers the ability to quickly and accurately document patient information at the point of care. The Winscribe Text mobility application is no exception, and it enables even greater functionality that improves communication, caregivers' productivity levels and the quality of patient care.

The mobility application works in conjunction with the Winscribe Text medical documentation management platform, which administers document creation, distribution and every step in between. The application allows clinicians to record dictations, access and report on patient appointments, securely transfer information, and review and manage documents – all while using a smartphone or tablet device.

## Key Features

- » Integrates with EHRs and other patient administration systems
- » Enables fast and easy dictation and documentation creation, synced with clinician schedules
- » Provides clinicians with a mobile platform to quickly review and electronically sign documents
- » Optimizes clinical documentation workflow, while enabling secure voice and data transmission

“Our doctors are much more productive and our workflow more transparent with Winscribe Text.”

## Key Benefits

The Winscribe Text mobility application provides healthcare professionals with powerful and flexible features that accelerate the capture and communication of clinical documentation. Other benefits include:

Quickly and accurately document patient information at the point of care

Access and report on patient appointments, and e-sign documents

Speech-driven clinical documentation

Reduce the risk of mistaken identity

Secure data transmission and patient data handling

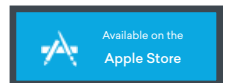

Boost clinician productivity

## Product Specifications

The Winscribe Text mobility application is supported with Winscribe Text v8.1+ platforms and on the following devices:

- iPad
- iPad Pro
- iPad mini
- iPad Air
- iPhone
- iPod touch

Note: iOS 9+ is required.

**IMPORTANT:** Downloading the Winscribe Text mobility application is free of charge. However, for complete functionality, users will need to have a Winscribe server licence.
