

# Winscribe Text

## Product Description

Administrative and clinical documentation in healthcare organizations is a considerable task and can be burdensome to clinics and hospitals that are looking to improve patient care. Healthcare organizations generate critical documents and reports for each patient including diagnosis, treatment, blood test reports, X-ray reports, and more – all of which need to be managed for the patient's care and for medicolegal or compliance reasons. With Winscribe Text, the processing and management of medical documentation is a breeze.

Winscribe Text is an integrated end-to-end medical report and documentation management solution for healthcare organizations that handles all steps in the documentation process – from creation to distribution, and every step in between. This innovative software system is a central platform for managing speech-driven documentation, as well as staff productivity, report distribution, quality assurance, and compliance. In addition, Winscribe Text provides a user-friendly interface that can be integrated with other Health Information Systems (HIS), enabling fast and accurate reporting and reducing data entry duplication and errors.

## Key Features

- » Integrates with one or more HIS, including EHR, PAS, LIS and RIS systems
- » Enables fast and easy dictation and documentation management, synced with clinician schedules
- » Customizable user interface that enables users to dictate, review, and eSign reports, all from a single window
- » Supports the optional use of speech recognition, in order to complete documentation even faster
- » Allows users to create and manage Word templates from a single point
- » Advanced tracking and auditing capabilities
- » Automatic distribution via fax, print, secure email, or directly into one or more HIS
- » Supports the capability to move resources, monitor production, and assess real-time needs that streamline decision-making

“Winscribe Text has provided a documentation solution that gives staff at LCCH the tools for creating documents quickly and accurately.”

# Complete Document Workflow Management

Winscribe Text supports clinicians throughout the entire medical documentation process, while providing instant access to information needed to capture complete patient encounters. The system manages all aspects of medical documentation and reporting, organized in three functional areas: Document Creation, Document Management and Document Distribution.

## Key Benefits

-  Optimize and accelerate EHR usage
-  Speech-enable data entry and documentation
-  Centrally manage templates and clinical documentation
-  Secure patient data handling, with a full audit trail
-  Support rich, detailed clinical narratives
-  Give physicians flexibility and boost productivity
-  Reduce the risk of mistaken identity
-  Manage internal and outsourced transcription
